

QuietBack™ Carpet Tiles

THE HIGHEST PERFORMING COMMERCIALLY GRADED ACOUSTIC CARPET TILES.

QuietBack™ carpet tiles are designed specifically for sound absorption. When a carpet is specified as featuring QuietBack™, you know that the holistic carpet construction has been optimised for its acoustic performance.

Unlike PVC and cushion back carpet tiles, QuietBack™ carpet tiles aren't manufactured using hard and sound-inhibiting PVC, bitumen or fiberglass substrates. Instead, the face pile layer of the carpet is attached directly to the felt, allowing the pile and felt backing to work together to trap sound. This increases the airflow capability of the tiles, which in turn increases the acoustic absorption results, and reduces the chance of tiles harbouring mold. This construction also makes QuietBack™ carpet tiles softer underfoot.

PEOPLE AND THE ENVIRONMENT ARE AT THE HEART OF THE QUIETBACK™ APPROACH

Acoufelt manufacture with precision to achieve exacting specification, utilising safe and sustainably-sourced fibers. A minimum of 80% recycled PET content is used in the backing of our tiles, closing the loop on a valuable resource. For every square metre QuietBack™ carpet tiles, this is the equivalent of diverting approximately 34 x 600ml PET drinking bottles from landfill.

Cushion Back & PVC Carpet Tiles v QuietBack™

An optimized construction to allow for acoustic and environmental benefits, material safety and underfoot comfort.

Environmental Attributes

-  Backing made from 80% min. recycled content
-  Fully recyclable content
-  Each square metre of carpet tiles contains 34 x 600ml PET drinking bottles
-  Generated using 40% solar energy

Certified low VOC
Total VOCs 0.5mg/m

Red List Free
Certified

100% recycled nylon yarn
Econyl can be found in various collections

Key Features

-  Superior acoustic performance
-  NRC Rating 0.35 – 0.40
-  Lightweight
-  Easy to cut and install
-  No bitumen, rubber, PVC or fiberglass
-  Superior breathability
-  Underfoot comfort
-  Backing made from 80% min. recycled materials and fully recyclable content
-  Excellent resistance to fire
-  Low maintenance
-  Thermal efficiency
-  Certified low VOC
-  Stain protection capabilities
-  20 year warranty against delamination under a castor wheel
-  Anti microbial treatment

Scatter – Granite
